

Century CARBON METAL BB

The Carbon Metal BB is a well thought out progression of an existing principal – used by Continental anglers: longer rods for lighter line fishing to cast big distances “at a stroke”.

Century ELIMINATOR BEACHCASTER

The low rod diameter, the ability to handle large baits and big weights at long range will appeal to anglers that fish the hardest conditions and still want a rod that is comfortable to use.

Century EXCALIBUR C BEACHCASTER

Century's well established Autoclave Technology, Gearbox Design and AT-T is complimented by a new HPR resin technology primarily in the tip section. Leading to significant reduction in the tip weight, greater toughness and a very fast tip recovery.

| CN0060 | C | 13ft 10 | 3.5-7oz | 2 | £514.50 | £450.00 |

Century EXCALIBUR J BEACHCASTER

When fishing the tip responds brilliantly to taught line bites and even sulky fish that just sit motionless will eventually give rattle indications which can easily be detected. The super slim diameter is stable in high winds and the low moment of inertia makes repetitive cast and retrieve much less tiring.

| CN0062 | J | 13ft 6 | 3.5-7oz | 2 | £514.50 | £450.00 |

Century EXCALIBUR TT BEACHCASTER

Designed primarily for hard to mixed ground fishing where you are likely to encounter strong tidal streams or dense weed and kelp. Think rough seas off North East coast, deep Norwegian Fjords, rugged Welsh coastlines and Excalibur TT is the tool to combat these challenging conditions.

Century EXCALIBUR BRAID BOAT

Built with a very supple tip, a slow progressive increase in power in the mid-section to accommodate the non-elastic properties of braid and the power then increases rapidly in the butt.
