DAIWA Powermesh X Spin

For any lure angler the Powermesh X will speak volumes to them as soon as they pick it up. The tippy action gives each model a lively feel that is just begging to be cast. They will thrust any lure through a head wind like a knife through the proverbial and pick up line in a millisecond and hit those hooks home. These rods are a dream. To assist line travel and aid braid users each model features SiC guides and extra numbers of intermediates. All those applied to the main action areas are low profile and smaller diameter too. This helps with the use of braid but also reduces weight in the tip making for a crisper recovery. The contoured EVA handle fits into the hand and the down locking fore grip brings the reel closer to the angler's hand.
